## PROFESSIONAL PROFILE

---

Results-oriented Project Management Executive with over 20 years of experience in the metal and mining industry, such as lithium, copper, molybdenum, rhenium, and rare earths. Demonstrated expertise in overseeing projects with capital expenditures exceeding USD 50 million. Proven track record of achieving operational excellence and driving business growth. Skilled in strategic planning, new business development, and international project management. Committed to sustainability and the circular economy.

## WORK EXPERIENCE

---

### **JMD Consultoría Ltda. ♦ New Business and Planning Manager (2020 – To date)**

Engineering company specializing in Project Management for the Mining Industry.

- Spearheaded the establishment of new business lines and joint ventures, focusing on Special Lithium Operation Contracts (CEOL)
- Successfully revamped the company's business model, resulting in a 12% increase in operating results.
- Implemented continuous improvement processes for project peer reviews on high-value projects.
- Led tender offerings by coordinating multidisciplinary teams, liaising with suppliers, and preparing economic proposal.

### **Molibdenos y Metales S.A. (Molymet) (2008 – 2020)**

Chilean company, one of the main processors of molybdenum and rhenium worldwide, with production plants in Chile, Mexico, Belgium and Germany; roughly 1,400 workers.

#### **♦ Deputy Manager, International Business and Planning (2013 – 2020)**

- Directed corporate strategic planning follow up and pre-investment studies for new business initiatives.
- Led the development and publication of the company's first Sustainability Report, and three Annual Reports, outlining key environmental, social, and governance (ESG) initiatives and achievements.
- Played a key role in seven Due Diligence processes for acquiring companies across various sectors.
- Designed and operated an information management system for the USD 600 million investment initiative, resulting in a USD 1.7 million tax refund.

#### **♦ Affiliate Management Control (2012 – 2013)**

- Provided management control for affiliates in Belgium and Germany, ensuring accurate financial reporting.

#### **♦ Project Engineer (2008 – 2012)**

Contributed to pre-feasibility studies for a molybdenum processing plant in China, leading to the structuring of a Joint Venture with a relevant key local player.
