

# Carlos Pinto Contreras

Electrical Engineer

## Summary

Electrical Engineer 12+ years of experience in design electrical equipment, services and project management. An autonomous worker committed to providing high quality services. High knowledge in MV and LV equipment. Proactive, leadership , team worker and positive.

## Experience

2018-12 - present

### Lead Project Engineer

GE Power Conversion

- Responsible for reviewing vendor technical specifications of projects.
- Work directly with the customer to address technical questions and project issues.
- Reviewing vendors Engineering and proposals
- Prepare technical and commercial Proposals based on GE offering with exceptions and special requirements clearly defined.
- Work with multidisciplinary areas.
- Achieve the goals of the company.
- Maximize the budget for the project.

2018-07 - 2018-11

### Lead Customer Application Engineer

ABB S.A

- Responsible for reviewing customer contracts and specifications of projects.
- Prepare technical and commercial Proposals based on ABB offering with exceptions and special requirements clearly defined.
- Support Requisition activities executed.
- Support commercial team in new project proposals.
- responsible for execution team activities in assembly plant.
- Project electrical solutions, review drawings, equipment specifications, system studies, and installation procedures.
- Work directly with the customer to address commercial, technical questions and project issues.
- Manage all activities for requisition engineering team.
- Achieve the goals of the company.
- Maximize the budget for the project.

2014-05 - 2018-06

### Lead Customer Application Engineer

GE Industrial Solutions

- Responsible for reviewing customer contracts and specifications of projects.
- Prepare technical and commercial Proposals based on GE offering with exceptions and special requirements clearly defined.
- Support Requisition activities executed.
- Support commercial team in new project proposals.
- responsible for execution team activities in assembly plant.
- Project electrical solutions, review drawings, equipment specifications, system studies, and installation procedures.

## Personal Info

### Address

C/ Merced  
356  
Depto 802 , Torre A

### Phone

+56998866248

### E-mail

carlos.pinto.c@gmail.com

### Date of birth

1981-10-04

### Marital status

Single, With a Son

### Citizenship

Chilean

### LinkedIn

linkedin.com/in/carlos-pinto-5763b01

## Skills

Salesforce

intermediate Level

Autocad

Upper level

Excel

intermediate Level

SAP Project System Module

Super User - Upper Level

ETAP

Basic Level , Protection Study

## Languages

English

Upper Level

Spanish

Native

- Work directly with the customer to address commercial, technical questions and project issues.
- Manage all activities for requisition engineering team.
- Achieve the goals of the company.
- Maximize the budget for the project.

2011-04 -  
2014-04

## Project Manager

GE Industrial Solutions

Responsible for project delivery, profit & loss accountability, and customer satisfaction through management of project related activities and resources.

### Main Projects (Electrical equipment supplied).

- Supervised roles that are responsible for direct or indirect leadership and/or management of project resources.
- Developed an operational year plan for the own department activities.
- Suggested improvements in products, processes and procedures.
- Worked together with high level people from the business and SPB and EB level.
- Specified needs, communicate about project approach and present outcomes of research done.
- Delivered all the projects on time, regarding the usual delays between clients and engineering team in order to complete the design.

2010-12 -  
2011-03

## Field Project Engineer

General Electric de Chile

- Executed the Installation, commissioning and start-up in HP DATA CENTER Project.
- Coordinated and supported engineers from USA whose helped in the project.

2006-12 -  
2010-12

## Lead Service Engineer

GTC Industrias Electricas

- Developed Electrical engineering drawings for retrofill and retrofit to MV and LV equipment mainly minning applications,
- programed electrical protection relays for different applications in MV and LV equipment, operation, mainly minning applications
- Installed, started-up and maintenance for electrical Equipment (several Brands)
- Led and executed FAT and SAT for LV and MV equipment (Hi-pot test, insulation test, contacts resistances, etc.).

2005-10 -  
2006-04

## Jr Project Engineer

INCH Ingenieros consultores

- Professional Practice, instrumentation area (P&ID Drawings, loop diagrams, etc)
- Draw and reviewed Instrumentation drawings for several projects.

## Education

2000-03 -  
2005-12

## University of Santiago , Electrical Engineering , Power Systems mention

Title: Electrical Engineer

Degree in applied engineering

1995-03 -  
1999-12

- **High School Salesianos alameda**  
Technical program developed in the Electromechanic specialty

**Courses**

2016-07 -  
2016-08  
  
2016-06 -  
2016-06  
  
2014-10 -  
2014-10  
  
2014-06 -  
2014-07  
  
2012-07 -  
2012-07

- FORMATTING DATA IN EXCEL 2013 - Pontificia Universidad Católica de Chile
- SAP Super User training - Puerto Rico
- Power Design Training - Bielsko Biala Plant - Poland
- Crotonville Leadership - GE Global Learning INFLUENCING SKILLS COURSE
- MV equipment Training - CHINA GE CENTER

**Interests**

- Ride a Bike.
- Movies.
- Sports practice, mainly Fútbol.
- Travelling
